

Alarm Clock Mini Project (Python)

Python Code:

```
import time
from playsound import playsound

alarm_time = input("Enter alarm time (HH:MM:SS): ")

print("Alarm set for", alarm_time)

while True:
    current_time = time.strftime("%H:%M:%S")

    if current_time == alarm_time:
        print("Wake Up! Alarm Ringing...")
        playsound("alarm.mp3") # Place alarm.mp3 in same folder
        break

    time.sleep(1)
```
